

REMARKS

The above amendment is believed to place the claims in proper condition for examination.

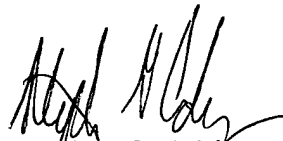

Early and favorable action is awaited.

Attached hereto is a marked-up version of the changes made to the claims by the current amendment. The attached page is captioned "Version with markings to show changes made."

In the event there are any additional fees required, please charge our Deposit Account No. 01-2340.

VERSION WITH MARKINGS TO SHOW CHANGES MADE

Claim 3-7 have been amended as follows:

3. (Amended) A photocurable sheet-form material according to claim 1 ~~or 2~~, wherein the polymerizable unsaturated monomer (a) is an acrylic type polymerizable monomer, and has a solubility parameter SP within a range from 8.1 to 10.0, which is calculated in accordance with a formula " $SP = \sum(G) / \text{molecular weight}$ " by using molar attraction constants G.

4. (Amended) A photocurable sheet-form material according to ~~any one of claims 1 to 3~~ claim 1, further comprising one or more resins (e) selected from a (meth)acrylic type polymer, an unsaturated polyester, a vinyl ester, or an urethane acrylate.

5. (Amended) A photocurable sheet-form material according to ~~any one of claims 1 to 4~~ claim 1, wherein the polymer (b) is included in an amount of 1 to 100 parts by weight, relative to 100 parts by weight of the polymerizable unsaturated monomer (a).

6. (Amended) A layered molding made of a laminate of a thermoplastic resin sheet and a photocurable sheet-form material according to ~~any one of claims 1 to 4~~ claim 1.

7. (Amended) A method of reinforcement, including a step of using a photocurable sheet-form material according to ~~any one of claims 1 to 3~~ claim 1 on a surface of a molded article.
